PROJECT PATIENT CONNECT

Communication is key – to efficiency, responsiveness, patient safety and patient satisfaction.

TOTAL: \$2,200,000

PLEASE CONSIDER ...

What would YOU expect during a stay in the hospital?

- Confidence that you're being well taken care of safely.
- Prompt communication regarding your health care and bedside needs.
- Time with doctors, nurses and caregivers.
- A good night's sleep and a quiet place to heal.

Project Patient Connect delivers a state-of-the-art nurse call system designed to optimize time spent on mission-critical functions and promote best practices throughout a patient's continuum of care. The Rauland Responder 5 system integrated with a Cisco wireless handset provides the ability to **instantly link nurses with their patients and physicians**, allowing for immediate communication among the entire medical team. This is accomplished over a secure network.

THE VALUE

- Ensures the right person gets the right call at the right time. Calls coming from a patient can be relayed directly to the nurse's wireless phone—real time. Nurses can consult with other staff members or with physicians, allowing for quicker response times to adjust medications or modify the treatment plan.
- Gives patients the ability to call for pain medication or other needs by simply pushing a nurse-call button at the bedside that connects directly with their nurse's wireless phone anywhere in the hospital.

- Increases staff efficiency and productivity, allowing for nurses to spend more time at the patient's bedside.
- Promotes a healing, stress-free environment with a quiet call system.

THE END RESULT:

- Enhanced healing environment where medical staff and caregivers spend more time delivering direct, quality care.
- Increased patient satisfaction.
- Improved clinical outcomes for the patient and possibly saved lives.

YOU CAN ADOPT A DEPARTMENT TO FUND THEIR PATIENT CONNECT SYSTEM:

Emergency Department	20 phones	\$224,000
1 South	8 phones	\$206,000
2 North and 2 Northwest	15 phones	\$342,000
3 North	10 phones	\$231,000
3 South/Pediatrics	9 phones	\$215,000
Acute Rehabilitation	6 phones	\$159,100
Maternity	18 phones	\$292,000

"We're really excited to have this new system. We believe that it will contribute to a very positive outcome for our patients, creating a healing and quiet environment in which families and patients can experience the sacred care that we provide at the Queen".

- Michele White, RN, ICU Nurse Manager
